Correction

In connection with the publication of Yearbook of Fishery Statistics 2006, the Directorate of Fisheries has detected an error in all tables containing information about the price of Northern prawn landed by third country vessels. The cause of the errors is that the landed weight of Northern prawn in several instances has been registered in the primary data without a corresponding price.

Table 3.6 shows that vessels from Greenland have landed 1,168 tonnes of Northern prawn to a value of 5,011,000 DKK. This should be changed to a weight of 1,198 tonnes and a value of 9,831,000 DKK. Further, the table shows that vessels from other third countries have landed 257 tonnes of Northern prawn to a value of below 500 DKK. This should be changed to a weight of 257 tonnes and a value of 2,239,000 DKK.
